

J.D. Edwards System Assessment

Make more use out of your J.D. Edwards Investment!

You made it through your initial implementation with great success - and as is normally the case, you have a "shopping list" of **additional features** you want to implement.

Maybe it has been a while now since you went live, and as is the case in most businesses, there has been some **staff turnover ...** and you don't know what other features you could be utilizing to your advantage.

Maybe you are feeling the heat of **new competitive threats** and pressures.

For these and other reasons, the time might be right for a **J.D. Edwards System Assessment** to be conducted.

Business today is about maximizing benefits and being more efficient. What better way to achieve this than to make more use out of what you already own.

Benefits you can expect from the Assessment:

- ✦ Identification and resolution recommendations for outstanding issues
- ✦ Elimination of user frustration - finding and fixing the little things that make a difference in the day to day working world
- ✦ New technology & software functionality awareness
- ✦ Cost savings through productivity improvements - achieve greater efficiencies, and/or improved accuracy
- ✦ Identification of knowledge gaps, which may be solved through additional training
- ✦ A formal report of recommendations, complete with timelines, prioritization and budget implications
- ✦ Re-assurance to senior management that the system is functioning properly

The System Assessment includes:

- ✦ An evaluation of your business processes
- ✦ A review of your current issues and areas of concern
- ✦ A survey of the modules, features and functions in use today.

The result is a minimal investment into your future that enhances your functionality, maximizes your benefits and allows you to become more efficient.

System Assessments are typically done by groupings of functionality or specific areas:

- ✦ General Ledger/Reporting/Budgeting
- ✦ Accounts Payable
- ✦ Credit and Collections
- ✦ Job Cost / Contract Management
- ✦ Sales Order Processing and Inventory
- ✦ Distribution Flow, Warehouse Management, Transportation
- ✦ Purchasing and Inventory
- ✦ Manufacturing Material Planning
- ✦ Resource and Capacity Planning
- ✦ Shop Floor Control
- ✦ Fixed Asset / Equipment Plant Maintenance
- ✦ Technical Foundation

We can customize a System Assessment to meet your specific needs. Take advantage of any or all of these process reviews.
