

SPREADSHEET SERVER

COMBINE THE FAMILIARITY OF MICROSOFT EXCEL WITH THE POWER OF YOUR JD EDWARDS® DATA

Spreadsheet Server works as an intuitive Microsoft® add-in providing live reporting and analysis from JD Edwards® data.

Benefits:

- Drill-down to sub-ledger detail in any JDE module
- Retrieve fixed asset totals based upon account and asset criteria with drill-down to detail, for FA reporting
- FASTR Report Conversion
- Perform job costing reporting and analysis
- Eliminate requirement for IT or super-users to create/change financial reports
- Use the narrative reporting feature of Spreadsheet Server to automatically generate your pre-formatted Excel reports in Word, PDF, or HTML format
- No staging area or data warehouse required.
- Deploy in minutes

Complements your existing BI Strategy

ORACLE Platinum Partner

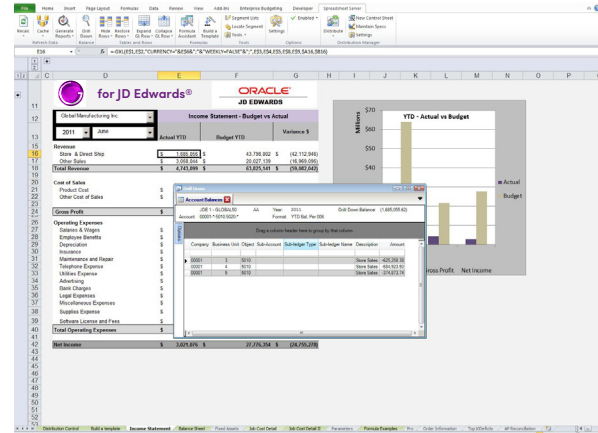

Connect-ability from Excel to multiple data sources across a variety of ERP platforms

Create any custom queries within JDE or any other relational database

The cloud-based QueryExchange™ allows the JDE user community to share pre-configured queries

No more downloading or re-keying/exporting of JDE balance or transaction level data

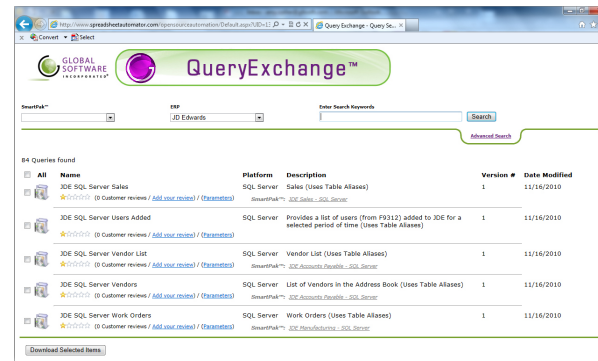

Enhanced data analysis leveraging new features in Excel 2013

Microsoft Partner
Gold Independent Software Vendor (ISV)

Reduce data calculation times by incorporating big data with SMARTcache™ (IMDB)

Access these JD Edwards subsystems:

GL, AR, AP, FA, Inventory, ALM, CRM, FMS, HCM, HSE, PM, SCM, MFG and more...

...AND MORE

Retrieve dynamic period, year-to-date, life-to-date and quarter balances using simple Excel formulas. Formula wizard is available to assist users in creating new formula expressions. Segment descriptions can also be retrieved or single accounts.

DYNAMITE BALANCES

Spreadsheet Server users have full access to Global's cloudbased QueryExchange™, a query repository shared by users around the globe. With intuitive search capabilities, users can immediately see, download and use queries built by their fellow JDE users directly in Microsoft® Excel.

SHARING IS CARING

Use wild cards, ranges, segment lists, or groups and sets to retrieve any combination of accounts into a single spreadsheet row. Segment Lists are user defined combinations of segments that are set at the local level or can be shared among multiple users.

COMBINATION STATION

Dynamic drill down capabilities allow for review of detailed account balances and journal entry information. Combine your reporting with account analysis to achieve more efficient analysis of your key data.

DRILL, DRILL, DRILL

LOCK IT DOWN

Spreadsheet Server uses company level security as defined in your JDE application.

SIGNED. SEALED. DELIVERED.

Automate the distribution process of your reports by using Distribution Manager Utility within Spreadsheet Server. Print or email your reports, all with the click of a button.

FASTR REPORT CONVERSION

The FASTR conversion utility allows for quick conversion of the row definition detail within a FASTR report.
